

# EQUINE-SAFE CLEANING & SANITISING PRODUCTS

When thoroughly sanitising and preparing your environment and equipment prior to returning to your venue, it is important to consider the use of appropriate cleaning materials, which are not only proven effective against Coronavirus, but also safe to use around both horses and humans.

In conjunction with the British Equestrian Trade Association (BETA), RDA has identified a selection of products from several companies which meet these criteria, and which will also not bleach or stain tack. Whilst this list of suppliers and products is not exhaustive, we hope it will enable groups to make informed choices. **Click on the product photos below**, to follow the link for full details, prices and ordering information on each of the companies' websites.

**Use code 'RDA' when ordering for 30% discount!**

**Items appearing as 'Out of Stock' on website are still available!**

Before ordering online, we advise contacting

**Tracy Richards, Aqueos MD & Founder: 07712 034521 to discuss the most suitable products/ quantities for your group.**
